

NEIRRS

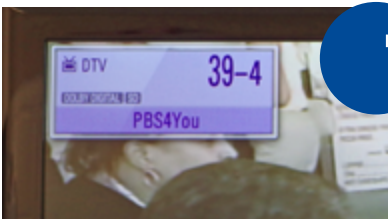

Northeast Indiana Radio Reading Service

Using your TV to enjoy NEIRRS

Thanks to a partnership between PBS39, Fort Wayne, The Allen County Public Library and the Northeast Indiana Radio Reading Service (NEIRRS), any citizen within reach of PBS39's broadcast signal can now engage NEIRRS by tuning their TV to channel 39.4 and making a simple adjustment to the audio program for that channel.

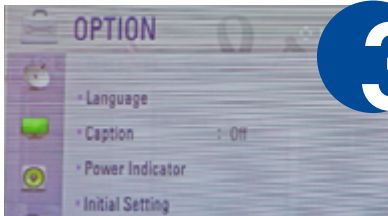

Please note: These instructions are broad in nature; every TV and remote may have slightly different instructions for you to follow. Please consult your on-set instruction manual or the hard copy manual that came with your television to be certain of any changes you make in your reception. Also, if you have a pay TV service provider in your home, you may wish to contact them to see how this will work through the signals they provide to your home.

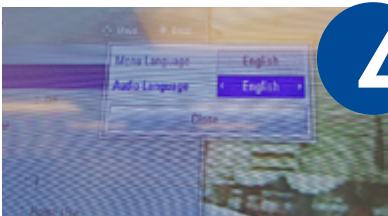

1 Tune to channel 39.4 using your television's remote.

2 Press the menu button. On your television's remote, press the menu button to turn on the on-screen instructions.

3 Find the "Language" setup menu. This could be in the main setup menu or part of the audio menu, depending on your set.

4 Choose the option to change the audio language. Inside the "Language" setup menu, you may have a choice between the onscreen language you would see in closed captioning, or the audio language the TV set will use. Choose the option to change the audio language.

5 Change the selection from "English" to "French." Again, depending on your TV/Remote setup, you may have a variety of languages to choose from, or just a few. In scrolling or choosing the language you need to select to engage NEIRRS reception on your set, change the selection from "English" to "French." At this point, you should hear the audio switch from the audio for 39.4 to the NEIRRS broadcast in English.

The Northeast Indiana Radio Reading Service (NEIRRS) signal broadcast as part of PBS39's signal on channel 39.4 is the same as found on a dedicated NEIRRS radio receiver. These are basic instructions to be used as a guide to help you receive the NEIRRS signal through your television set and an adjunct to this primary service.

Questions on the setup?

Northeast Indiana Radio Reading Service

Allen County Public Library

The Allen County Public Library is a service institution. It seeks to inform, educate, entertain, and culturally enrich the entire community by providing books and other library materials, facilities, and professional services for free use by all residents.

Northeast Indiana Radio Reading Service (NEIRRS)

NEIRRS is a department of the Allen County Public Library. The purpose of NEIRRS is to provide audio access to printed information for people who have visual, physical, learning or language challenges to independent reading.

PBS39

The Mission of Fort Wayne Public Television, PBS39, is to provide high quality telecommunications services which enhance the quality of life in the communities we serve through educational, informational, cultural and entertaining programs and services. PBS39 is the northeast Indiana region's only public television broadcaster and sole locally owned-and-operated television station. We broadcast four channels 24-hours daily: PBS39/Channel 39.1; Kids39/Channel 39.2; CreateTV/Channel 39.3 and 39 Explore/Channel 39.4.
